

FOR IMMEDIATE RELEASE - January 21, 2013

Metal Coaters Strengthens Position as a Nationwide Coil Coater With Successful Commissioning of Middletown, OH Facility.

HOUSTON, TX. (January 21, 2013) – Metal Coaters (a business segment of NCI Group, Inc.) proudly announces the official opening of its Coil Coating Facility in Middletown, OH. The facility, previously operated by Material Sciences Corp., was purchased in June 2010 and has since been substantially revamped and modernized to become state-of-the-art. The facility can coat various gauges and widths of metal for a wide variety of applications, with either conventional, dried-in-place, or RoHS compliant pretreatments.

In addition to modernizing the Coil Coating Line, an Embossing Unit has been installed at the facility and a Rail Spur was constructed to provide additional flexibility for customers who desire toll processing of their metal substrate. The company now operates four strategically located light-gauge, coil coating facilities providing maximum supply chain flexibility for its customers.

John Kuzdal, President of Metal Coaters, states “This newly opened facility will allow customers in the Midwestern and Great Lakes regions to experience the flexibility, reliability, quality, and service that manufacturers in the rest of the United States have come to depend on from Metal Coaters. With the addition of the Middletown, Ohio facility, we now operate facilities in three time zones and we are the only coil coater in the United States who can provide localized service to every manufacturing region of significance in the United States.”

About Metal Coaters

Metal Coaters uses state-of-the-art techniques to clean, pre-treat, and roll-apply organic coatings in a continuous process on Hot Dipped Galvanized, Galvannealed, Galvalume®, Cold Rolled, Electro-Galvanized Steel and Aluminum Coils.

As a full service coil coater, Metal Coaters offers a complete line of coating finishes including Polyesters, Silicone Modified Polyesters (SMP), Fluorocarbons (PVDF), and Plastisol (PVC). Coatings are available for interior or exterior and for warranted or non-warranted applications. Additionally, Metal Coaters® has slitting and embossing capabilities performed separate from the coil coating processes on dedicated production lines.
