CENTRIA Coating Services Becomes Metal Coaters

Ambridge, PA— 7/19/18 — CENTRIA Coating Services, a leading metal coil coating company for over 50 years, is announcing today it will assume the name Metal Coaters on July 30, 2018.

In January 2015, CENTRIA Coating Services was acquired by NCI Building Systems Inc. (NYSE: NCS). Since that time, CENTRIA Coating Services and Metal Coaters, NCI's legacy coil coating business unit, have worked together to integrate the businesses while maintaining their individual reputations for producing high-quality products, offering flexible schedules, and delivering exceptional customer experiences.

With the integration process now complete, the two Coil Coating businesses will function as one brand, Metal Coaters. The combined entity will operate with one enterprise system providing increased flexibility to meet customer needs. The combined entity will operate six light gauge metal coil coating locations and two hot rolled steel coil coating lines. The former CENTRIA Coating Services' toll coating lines, located in Ambridge, Pennsylvania and Cambridge, Ohio, will continue to deliver proven expertise in the demanding markets of prepainted aluminum and custom architectural coatings. These strategically located facilities complement Metal Coaters production footprint, capabilities and product offerings further establishing Metal Coaters as a leading provider of Metal Coil Coating Services, with the most diverse set of capabilities and the only nationwide network of locations in the United States.

In addition to the name change of CENTRIA Coating Services' to Metal Coaters, CoilTracker will be introduced to all customers of the Ambridge and Cambridge locations. CoilTracker is an established platform for web-based inventory management. Metal Coaters

customers have utilized CoilTracker for many years to access their inventory, schedule shipments, track open orders, and generate reports - all in real time. Ambridge and Cambridge customers will soon receive information about the conversion to the CoilTracker on-line inventory management system from their customer service representative.
